

## JOB OPENING

SEDC is currently looking to fill a new position for a Financial Assistance Officer to help drug treatment organizations with their finances and organization. The purpose of the position is to gain funding for these organizations for their capital projects and operational cash flow issues, through awards of the anticipated government and private funds that will be available and critical to fighting this epidemic.

We have some specific measures for getting our groups ready for what we hope is a wave of funds:

- budgets
- business plans
- internal controls
- procurement procedures
- audit preparation and selection
- grant awareness and application
- subsidized loan awareness and application.
